About This Assessment

The Church Assessment Platform is a 91-question, evidence-based congregational health tool designed specifically for AME Zion churches. It measures satisfaction, energy, and effectiveness across 17 ministry categories — giving pastors and leadership teams the clear, actionable data they need to grow, plan, and fulfill God's calling.

This sample shows 7 representative questions drawn from 5 of the 17 categories. The full assessment is deployed digitally via a secure, mobile-friendly link and takes members 20–25 minutes to complete. All responses are anonymous and reported in aggregate — never individually identified.
